Misc. Case No. H-10-981 M

(UNDER SEAL)

**UNSEALED  
PER ORDER**

dated 5/19/11

APPLICATION

**A. INTRODUCTION**

Eric D. Smith, an Assistant United States Attorney for the Southern District of Texas, hereby applies to the Court for an Order:

1. Pursuant to 18 U.S.C. §§ 3122 and 3123, authorizing the continued use of a pen register and trap and trace device<sup>1</sup> on the following mobile telephone issued by T-Mobile, telephone number \_\_\_\_\_ (hereinafter the "Target Device"), subscribed to \_\_\_\_\_ in Houston, Texas, and believed to be used by \_\_\_\_\_.

2. Pursuant to 18 U.S.C. §§ 2703(c) & 2703(d) and 47 U.S.C. § 1002, directing the **Target Device** service provider (including any internet service provider or other electronic

<sup>1</sup> A "pen register" is a "device or process which records or decodes dialing, routing, addressing, or signaling information transmitted by an instrument or facility from which a wire or electronic communication is transmitted, provided, however, that such information shall not include the contents of any communication ..." 18 U.S.C. § 3127(3). A "trap and trace device" is "a device or process which captures the incoming electronic or other impulses which identify the originating number" or other identifiers "reasonably likely to identify the source of a wire or electronic communication, provided, however, that such information not include the contents of any communication." 18 U.S.C. § 3127(4).

communications provider providing voice-over IP telephony [VoIP]),<sup>4</sup> and any and all other telecommunication providers, persons, or entities providing wire or electronic communications service in the United States whose assistance may facilitate the execution of the Order, to disclose or provide, upon oral or written demand by agents of the Drug Enforcement Administration (hereinafter the “Investigative Agency”),

a. For the **Target Device**, records or other information pertaining to subscriber(s) or customer(s), including historical cell site information<sup>5</sup> and call detail records<sup>6</sup> (including in two-way radio feature mode) for the sixty (60) days prior to the date the Order is signed by the Court (but not including the contents of communications).

b. For the **Target Device**, after receipt and storage, records or other information pertaining to subscriber(s) or customer(s), including the means and source of payment for the service and cell site information, provided to the United States on a continuous basis contemporaneous with (a) the origination of a call from the **Target Device** or the answer of

---

4

VoIP is essentially a type of hardware and software that allows people to use the internet as a transmission medium for telephone calls. In general, this means sending voice information in the form of digital packets of information rather than sending it through the traditional public switch telephone network.

5

To place a call, a cell phone must send a radio signal to an antenna tower which, in turn, is connected to the provider's network. The area covered by the tower varies depending on the population density of the area. This area is often divided into thirds--120 degree sectors. “Cell site information” as used in this order refers to the antenna tower and sector to which the cell phone sends its signal. This includes the physical location and/or address of the cellular tower and identification of the particular sector of the tower receiving the signal.

6

“Call detail records” are similar to toll records (i.e. historical telephone records of telephone activity, usually listing outgoing calls and date, time, and duration of each call), which are made and retained in the ordinary course of business. However, “call detail records” is the term used when referring to toll records of mobile telephones rather than hardline telephones. Unlike toll records, however, call detail records also include a record of incoming calls and the cellsite/sector(s) used by the mobile telephone to obtain service for a call or when in an idle state.

a call to the **Target Device**, (b) the termination of the call and (c) if reasonably available, during the progress of the call, but not including the contents of the communications. Specific disclosure of cell site information will assist law enforcement in identifying the approximate physical location of the **Target Device** and will not disclose content of the calls.

c. After receipt and storage, the following subscriber records and other information for the **Target Device** and for all published, non-published, or unlisted dialing, routing, addressing, or signaling information captured by the pen register and trap and trace device on the **Target Device**:

- (A) name;
- (B) address
- (C) local and long distance telephone connection records, or records of session times and durations
- (D) length of service (including start date) and types of service utilized;
- (E) telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address;
- (F) date of birth;
- (G) social security number;
- (H) driver's license (state and number);
- (I) contact names and numbers; and
- (J) employment information.

d. Any and all changes (including additions, deletions, and transfers) in service regarding the **Target Device**, including telephone numbers (including IMSIs and UFMIs) and subscriber information (published, non-published, listed, or unlisted) associated with these service changes.

**B. CERTIFICATION FOR A PEN REGISTER AND A TRAP AND TRACE DEVICE PURSUANT TO 18 U.S.C. §§ 3122 AND 3123**

In support of this application, I state the following:

1. I am an “attorney for the Government” as defined in Rule 1(b)(1)(B) of the Federal Rules of Criminal Procedure, and therefore, pursuant to 18 U.S.C. § 3122, may apply for an order authorizing the installation and use of pen registers and trap and trace devices.

2. I certify that the information likely to be obtained from the pen register and trap and trace device on the **Target Device** is relevant to an ongoing criminal investigation being conducted by the **Investigative Agency** in connection with possible violations of federal criminal statutes, including 21 USC §§ 841(a)(1), 846, and 952 by

3. In accordance with 18 USC § 3121(c), Applicant has informed the **Investigative Agency** that it shall use technology reasonably available to it to restrict the recording or decoding of electronic or other impulses to the dialing, routing, and addressing and signaling information utilized in the processing and transmitting of wire or electronic communications so as not to include the contents of any wire or electronic communication. .

4. Therefore, based upon the above certification and pursuant to 18 U.S.C. §§ 3122 and 3123, I request that the Court issue an order authorizing:

a. The **Investigative Agency** to install, or cause the provider to install, and use, a pen register device(s) anywhere in the United States to record or decode dialing, routing, addressing, or signaling information (including “post-cut-through dialed digits”) transmitted <sup>7</sup> from the **Target Device**, to record the date and time of such dialings or transmissions, and to record the length of time the telephone receiver in question is “off the hook” or connected for

---

7

Including dialing, routing, addressing, or signaling information transmitted over the communication service provider’s network by a two-way radio feature (including, but not limited to, Nextel’s “Direct Connect/Direct Dispatch,” Verizon Wireless’ “Push to Talk,” or Sprint’s “ReadyLink”). This two-way radio feature, like a walkie-talkie, provides communication between similarly equipped mobile phones by pressing a button on the telephone. As mentioned, information transmitted by the two-way radio feature will not disclose content of the call.

incoming or outgoing calls, for a period of sixty (60) days from the date the order is signed by the Court.

b. The **Investigative Agency** to install, or cause the provider to install, and use, a trap and trace device(s) on the **Target Device** anywhere in the United States to capture and record the incoming electronic or other impulses which identify the originating numbers or other dialing, routing, addressing, or signaling information<sup>8</sup> reasonably likely to identify the source of a wire or electronic communication and to record the date, time, and duration of calls created by such incoming impulses, for a period of sixty (60) days from the date the Order is signed by the Court.

c. That, pursuant to 18 U.S.C. § 3123(b)(1)(c), the requested installation and use of a pen register as well as trap and trace device permit the use of each not only on the **Target Device**, but also on any changed telephone number(s) (MIN[s]) subsequently assigned to an instrument bearing the same IMSI, UFMI, or SIM as the **Target Device**, or any changed IMSI, UFMI and/or SIM subsequently assigned to the same MIN as the **Target Telephone**, and any additional changed MIN, IMSI, UFMI and/or SIM, whether the changes occur consecutively or simultaneously, listed to the same subscriber or account number as the **Target Device** within the 60-day period authorized by the Order.

5. I further request, pursuant to 18 U.S.C. §§ 3123(a)(1) and 3123(b)(2), that the Order direct that the furnishing of information, facilities, and technical assistance necessary to

---

8

Including dialing, routing, addressing, or signaling information transmitted over the communication service provider's network by a two-way radio feature (including, but not limited to, Nextel's "Direct Connect/Direct Dispatch," Verizon Wireless' "Push to Talk," or Sprint's "ReadyLink"). As mentioned, information transmitted by the two-way radio feature will not disclose content of the call.

accomplish the installation and operation of the pen register and trap and trace device by the **Target Device** service provider (including any internet service provider or other electronic communications provider providing VoIP), and any and all other telecommunication providers,<sup>9</sup> persons, or entities providing wire or electronic communications service in the United States whose assistance may facilitate the execution of the Order (hereinafter, collectively, the “**Target Device Service Provider[s]**”), occur unobtrusively and with a minimum of interference with the services that are accorded the persons with respect to whom the installation and use is to take place, with reasonable compensation to be paid by the **Investigative Agency** for reasonable expenses directly incurred in providing such information, facilities, and assistance.

6. I further request that the Order direct the **Target Device Service Provider(s)** furnish the results of the pen register and trap and trace devices to Special Agents of the **Investigative Agency** as soon as practicable, on a continuing basis, twenty-four (24) hours a day for the duration of the order.

7. I further request, because it is necessary to advance the purposes of this investigation, that the Court’s Order direct the **Target Device Service Provider(s)** not to terminate or restrict service to the **Target Device**; provided that, upon notice to the **Investigative Agency** that the **Target Device** service would otherwise be terminated for non-payment pursuant to routine billing practices, the **Investigative Agency** timely agrees in writing to assume

---

9

The reference to “any and all other telecommunication providers” is necessary so that the Court order is still effective in the event that the **Target Device** is transferred to another carrier pursuant to “Local Number Portability” (“LNP”). LNP allows a telephone user to change his telephone company but still keep the same telephone number. However, to transfer (i.e. “port”) a telephone number pursuant to LNP, the subscriber information must remain the

financial responsibility for all services provided to the **Target Device** after termination would otherwise have been effectuated and continuing to the earlier of the **Investigative Agency's** written notice to terminate service or to the expiration of the Court order (and any extensions thereof).

**C. SPECIFIC AND ARTICULABLE FACTS ESTABLISHING REASONABLE GROUNDS TO BELIEVE THAT SUBSCRIBER RECORDS AND CELL SITE INFORMATION ARE RELEVANT AND MATERIAL TO AN ONGOING CRIMINAL INVESTIGATION PURSUANT TO 18 U.S.C. § 2703**

1. 18 U.S.C. § 2703(d) provides that a court may issue an order authorizing disclosure of a record or other information pertaining to a telephone subscriber or customer (not including the contents of communications) when a United States agency provides the Court with “[S]pecific and articulable facts showing that there are reasonable grounds to believe that ... the records or other information sought, are relevant and material to an ongoing criminal investigation.” 18 U.S.C. § 2703(d).

The statute, by its own language, precludes holding the United States to a higher standard of proof, such as probable cause. See Communications Assistance for Law Enforcement Act (CALEA), Pub. L. No. 103-414 § 207(2), reprinted in 1992 U.S. Code Cong. & Admin. News 4292. The House Report reflected that “[t]his section imposes an intermediate standard to protect on-line transactional records. It is a standard higher than a subpoena, but not a probable cause warrant.” See H.R. Rep. No. 103-827, at 31-32 (1994), reprinted in 1994 U.S.C.A.A.N. 3489, 3511-12.

---

same. Thus, this reference applies if the **Target Device** is transferred (i.e. “ported”) to another telephone carrier, but the telephone number and subscriber information remain the same.

2. For the purposes of obtaining a court order for disclosure as described in 18 U.S.C. §§ 2703(c)(1)(B) and 2703(c)(2), and in order to satisfy the requirements of 18 U.S.C. § 2703(d), Applicant, based on discussions with SA John W. Moore, hereby sets forth the following specific and articulable facts showing that there are reasonable grounds to believe that the records and other information identifying subscribers (but not including the contents of communications) for telephone numbers identified through the pen register and trap and trace device on the **Target Device**, cell site information regarding the **Target Device**, subscriber information associated with any service changes regarding the **Target Device**, and the records or other information pertaining to subscribers (but not including the contents of communications) for the **Target Device** will be relevant and material to an ongoing criminal investigation:

a. Based in part on information obtained from this investigation, [redacted] has been identified as an [redacted] distributor operating in the Houston, Texas area. DEA Houston and Texas Department of Public Safety (DPS) have utilized confidential sources and an undercover agent to identify [redacted] distribution activities. Specifically on [redacted], a confidential source (CS) was directed to place an outgoing call, recorded by [redacted]; [redacted] cellular telephone (**Target Device**). During the recorded call, [redacted]

Based on SA Moore's training and experience, he believes

that in this conversation,

Based on SA Moore's experience, it is believed that the **Target Device** is utilized to arrange for the transportation and distribution of narcotics. In addition, two additional controlled purchases have been conducted involving

coordinated these controlled purchases by utilizing the **Target Device**. The use of the pen register and trap and trace device has produced vital information concerning the telephone contacts with known criminal associates and sources of supply.

b. In SA Moore's experience, information identifying the subscribers for numbers captured by a pen register and trap and trace device, and subscriber information associated with service changes, has yielded information that is relevant and material to narcotics trafficking investigations. Such information includes leads relating to:

- (A) the names of suspected suppliers, customers, and other individuals who assist in the distribution of narcotics;
- (B) the location of “stash” houses where narcotics are stored;
- (C) the identity of transportation sources used by the drug traffickers;
- (D) the locations of money transfer businesses used by members of the operation to launder proceeds of drug trafficking activities or through which money is exchanged with coconspirators;
- (E) the geographic breadth of the suspected drug trafficking cell; and
- (F) the identities of potential organizers, leaders, managers, or supervisors of the suspected trafficking cell by examining the calling patterns revealed by the toll data.

SA Moore has advised Applicant that based upon his training and experience, one way to identify coconspirators is to evaluate the pattern of calls made to and from the **Target Device** – and to obtain information identifying subscribers for these calls – and then conduct an investigation concerning those individuals. Based upon subscriber information, SA Moore would then direct other investigators to conduct surveillance at these individuals’ addresses and determine if criminal activity was occurring there, which in turn could yield potential names of coconspirators and potential narcotics storage locations used by the organization.

c. Obtaining the subscriber name, address, date of birth, social security number, driver’s license information, contact names and numbers, employment information; and method of payment is critical to accurately identifying such subscribers because, among other things:

- (A) if the subscriber name is a common one and/or the subscriber address is not current, it can be difficult to accurately identify the subscriber without a date of birth, driver’s license, or social security number, especially in an area with a population as the Southern District of Texas;
- (B) if the subscriber name and address is fictitious, which frequently is the case when criminals purchase telephones, all or part of the remaining identification information may be truthful

and help identify the subscriber or lead to identifying other coconspirators; and

(C) by accurately identifying subscribers using the above-requested information, agents can eliminate innocent individuals as targets.

d. The investigating agents have further advised me that the general geographic location of the **Target Device** derived from cell site information used by the **Target Device** can be used to corroborate the observations of surveillance agents. More specifically, surveillance agents can compare observations of the user of the **Target Device** with cell site information in order to verify the identification and proximate location of the user of the **Target Device**.

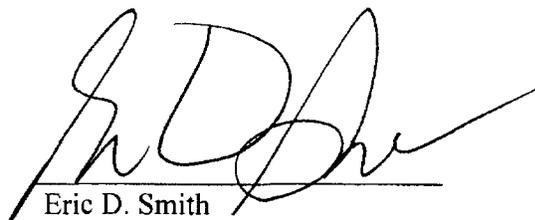

3. Accordingly, based upon the above proffer, and pursuant to 18 U.S.C. §§ 2703(c)(1)(B) and 2703(d), because there are reasonable grounds to believe that such information is relevant and material to the ongoing investigation, I further request that the Court issue an Order requiring the **Target Device's Service Provider(s)** disclose, or provide upon oral or written request by Special Agents of the **Investigative Agency**, the information set forth above in Section A2.

**D. REQUEST THAT THE ORDER PRECLUDE NOTICE AND THAT THE APPLICATION AND ORDER BE FILED UNDER SEAL**

1. Based upon the information provided in this application, I believe disclosure of the requested court Order may result in flight from potential prosecution or the destruction of or tampering with evidence, or may otherwise seriously jeopardize the investigation. Moreover, the exact nature of the United States "pen register" device and its configuration is classified as a

law enforcement sensitive investigative technique, the disclosure of which would likely jeopardize other on-going investigations, and/or future use of the technique. Therefore, pursuant to 18 U.S.C. §§ 2705(b) and 3123(d), I request that this application and Order be **SEALED**, that the identity of any targets of the investigation may be redacted from any copy of the order served on any service provider or other person, and that the Court direct the **Target Device's Service Provider(s)** not to disclose in any manner, directly or indirectly, by any action or inaction, the existence of the Order, in full or redacted form, of the pen register or trap and trace devices, or of this investigation, to the listed subscriber(s) for the **Target Device**, the occupant of said premises, the subscribers of the incoming calls to or outgoing calls from the **Target Device**, or to any other person the listed subscriber(s) for the **Target Device**, or to any other person, until otherwise ordered by this Court.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief, and that this declaration was executed on October 4, 2010, at Houston, Texas.

**UNITED STATES DISTRICT COURT  
FOR THE SOUTHERN DISTRICT OF TEXAS  
HOUSTON DIVISION**

IN THE MATTER OF THE	§	
APPLICATION OF THE UNITED	§	
STATES OF AMERICA FOR AN	§	Misc. Case No. <u>14-10-981M</u>
ORDER: (1) AUTHORIZING THE	§	
CONTINUED USE	§	
OF A PEN REGISTER AND TRAP	§	
AND TRACE DEVICE, AND	§	
(2) AUTHORIZING RELEASE	§	(UNDER SEAL)
OF SUBSCRIBER AND OTHER	§	
INFORMATION	§	

**ORDER**

Before this Court is an application under 18 U.S.C. §§ 2703(c), 2703(d), 3122, and 3123, and 47 U.S.C. § 1002, by Assistant United States Attorney Eric Smith, an attorney for the Government as defined by Fed. R. Crim. P. 1(b)(1)(B), requesting an Order authorizing the continued installation and use of a pen register and trap and trace device on mobile telephone issued by T-Mobile, telephone number . . .

**UPON REVIEW OF THE APPLICATION, THE COURT HEREBY FINDS THAT:**

Pursuant to 18 U.S.C. § 3123, Applicant has certified that the information likely to be obtained by such use is relevant to an ongoing criminal investigation being conducted by the Drug Enforcement Administration (hereinafter the “**Investigative Agency**”) in connection with possible violations of 21 USC §§ 841(a) (1), 846, and 952 by

Pursuant to 18 U.S.C. §§ 2703(c)(1)(B) and 2703(d), Applicant has offered specific and articulable facts showing that there are reasonable grounds to believe that records or other

information identifying subscribers or customers (not including the contents of communications) for telephone numbers identified through the pen register and trap and trace devices on the **Target Device**, changes in service regarding the **Target Device**, cell site information<sup>1</sup> regarding the **Target Device**, and records or other information pertaining to subscriber(s) or customer(s) (but not including the contents of communications) for the **Target Device** are relevant and material to an ongoing criminal investigation of the specified offenses.

**THEREFORE, IT IS HEREBY ORDERED**, pursuant to 18 U.S.C. § 3123, that agents of the **Investigative Agency** may install, or cause to be installed, and continue to use a pen register anywhere in the United States to record or decode dialing, routing, addressing, or signaling information transmitted<sup>2</sup> from the **Target Device**, to record the date and time of such dialings or transmissions, and to record the length of time the telephone receiver in question is “off the hook” or connected for incoming or outgoing calls and attempts, for a period of sixty (60) days from the date this Order is signed, provided, however, that such information shall not include the contents of any communication;

---

<sup>1</sup> To place a call, a cell phone must send a radio signal to an antenna tower which, in turn, is connected to the provider's network. The area covered by the tower varies depending on the population density of the area. This area is often divided into thirds--120 degree sectors. “Cell site information” as used in this order refers to the antenna tower and sector to which the cell phone sends its signal. This includes the physical location and/or address of the cellular tower and identification of the particular sector of the tower receiving the signal.

<sup>2</sup> Including dialing, routing, addressing, or signaling information transmitted over the communication service provider's network by a two-way radio feature (including, but not limited to, Nextel's “Direct Connect/Direct Dispatch,” Verizon Wireless' “Push to Talk”, or Sprint's “ReadyLink”).

**IT IS FURTHER ORDERED**, pursuant to 18 U.S.C. § 3123, that agents of the **Investigative Agency** may install, or cause to be installed, and continue to use a trap and trace device on the **Target Device** anywhere in the United States to capture and record the incoming electronic or other impulses which identify the originating numbers or other dialing, routing, addressing, or signaling information<sup>3</sup> reasonably likely to identify the source of a wire or electronic communication, and to record the date, time, and duration of calls created by such incoming impulses, for a period of sixty (60) days from the date this Order is signed provided, however, that such information shall not include the contents of any communication;

**IT IS FURTHER ORDERED**, pursuant to 18 U.S.C. §§ 2703(c)(1)(B), 2703(c)(2), and 2703(d), that the **Target Device's** service provider (including any internet service provider or other electronic communications provider providing voice-over IP telephony [VoIP]), and any and all other telecommunication providers, persons, or entities providing wire or electronic communications service in the United States whose assistance may facilitate the execution of this Order (hereinafter, collectively, the "**Target Device's Service Provider[s]**"), shall disclose or provide, upon oral or written demand by agents of the **Investigative Agency**:

1. For the **Target Device**, records or other information pertaining to subscriber(s) or customer(s), including historical cellsite information and call detail records (including in two-way radio feature mode) for the sixty (60) days prior to the date this Order is signed by the Court.

2. For the **Target Device**, after receipt and storage, records or other information pertaining to subscriber(s) or customer(s), including the means and source of payment for the service

---

<sup>3</sup> Including dialing, routing, addressing, or signaling information transmitted over the communication service provider's network by a two-way radio feature (including, but not limited to, Nextel's "Direct Connect/Direct Dispatch," Verizon Wireless' "Push to Talk", or Sprint's "ReadyLink").

and cellsite information, provided to the United States on a continuous basis contemporaneous with (a) the origination of a call from the **Target Device** or the answer of a call to the **Target Device**, (b) the termination of the call and (c) if reasonably available, during the progress of the call, but not including the contents of the communications.

3. After receipt and storage, the following subscriber records and other information for the **Target Device** and for all published, non-published, or unlisted dialing, routing, addressing, or signaling information captured by the pen register and trap and trace device on the **Target Device**:

- (A) name;
- (B) address;
- (C) local and long distance telephone connection records, or records of session times and durations;
- (D) length of service (including start date) and types of service utilized;
- (E) telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address;
- (F) date of birth;
- (G) social security number;
- (H) driver's license (state and number);
- (I) contact names and numbers; and
- (J) employment information

4. Any and all changes (including additions, deletions, and transfers) in service regarding the **Target Device**, including telephone numbers (including IMSIs and UFMIs) and subscriber information (published, non-published, listed, or unlisted) associated with these service changes.

**IT IS FURTHER ORDERED** that this authorization for the installation and use of a pen register and trap and trace device applies not only on the **Target Device**, but also on any changed telephone number(s) (MIN) subsequently assigned to an instrument bearing the same IMSI, UFMI, or Subscriber Identity Module (SIM) as the **Target Device**, or any changed IMSI, UFMI, or SIM

subsequently assigned to the same MIN as the **Target Device**, and any additional changed MIN and/or IMSI, UFMI, or SIM, whether the changes occur consecutively or simultaneously, listed to the same subscriber or account number as the **Target Device** within the 60-day period authorized by this order.

**IT IS FURTHER ORDERED**, pursuant to 18 U.S.C. §§ 3123(a)(1) and § 3123 (b)(2), that upon service of this Order upon it, that the **Target Device's Service Provider(s)** shall furnish agents of the **Investigative Agency** with all information, facilities, and technical assistance necessary to accomplish the installation and use of the pen register and trap and trace devices, unobtrusively and with minimum interference with the services that are accorded the persons with respect to whom the installation and use is to take place;

**IT IS FURTHER ORDERED** that the **Target Device's Service Provider(s)** shall furnish the results of the pen register and trap and trace devices to agents of the **Investigative Agency** as soon as practicable, on a continuing basis, twenty four (24) hours a day for the duration of the order.

**IT IS FURTHER ORDERED** that the **Target Device's Service Provider(s)** be reasonably compensated by the **Investigative Agency** for reasonable expenses directly incurred in providing information, facilities, and assistance,

**IT IS FURTHER ORDERED** that the **Target Device's Service Provider(s)** shall not terminate or restrict service to the **Target Device**; provided that, upon notice to the **Investigative Agency** that the **Target Device's** service would otherwise be terminated for non-payment pursuant to routine billing practices, the **Investigative Agency** timely agrees in writing to assume financial responsibility for all services provided to the **Target Device** after termination would otherwise have been effectuated and continuing to the earlier of the **Investigative Agency's** written notice to

terminate service or to the expiration of this Order (and any extensions thereof); and,

Good cause having been shown, **IT IS FURTHER ORDERED**, pursuant to 18 U.S.C. §§ 2705(b) and 3123(d), that this Order and the application be **SEALED** until otherwise ordered by the court, that the identity of any targets of the investigation may be redacted from any copy of the order served on any service provider or other person, and that that the **Target Device's Service Provider(s)** shall not disclose in any manner, directly or indirectly, by any action or inaction, the existence of this Order, in full or redacted form, of the pen register or trap and trace devices, or of this investigation, to the listed subscriber(s) for the **Target Device**, or to any other person, unless otherwise ordered by this Court.

Signed on this the \_\_\_ day of October 4, 2010, at Houston Texas.

---

Steven W M. Smith  
United States Magistrate Judge  
Southern District of Texas
