** Oppose National ID Cards!**

- National ID systems historically have been used by repressive governments to track citizens.

- In apartheid South Africa, National ID cards were used to exclude blacks from voting and other activities.

- National ID cards have not stopped car bombing campaigns in Spain, France and Italy.

- Immediately after 9/11, 70% of Americans supported the idea of a National ID; however, by October 3, the number had dropped to 51%.

- Larry Ellison, CEO of Oracle, says he wants to provide database software for a National ID system in response to the terrorist attacks; yet his plan was in the works BEFORE 9/11.

  *Don't mistake profitability for security!*

- Proposals in the US House and Senate would impose National ID systems on all non-citizens. Soon enough, those National ID systems would be expanded to citizens.
